## Ethereum

Rank: #3

Circulating Supply: 104,743,011 ETH

Ethereum (ETH) is a smart contract platform that enables developers to build decentralized applications (dapps) conceptualized by Vitalik Buterin in 2013. ETH is the native currency for the Ethereum platform and also works as the transaction fees to miners on the Ethereum network.

## Bitcoin

In the News:

### Singaporean and Eastern European P2P Markets Post Record BTC Volume

Several markets have seen spikes in peer-to-peer (P2P) volume, with the Kazakh and Singaporean Localbitcoins markets posting their second strongest weeks on record. Polish P2P trade also increased this past week, with volume reaching a 14-month high.

### The Daily: F1 Team Gets Crypto Sponsor, Dubai Royal Partners Digital Assets Fund

In Wednesday's edition of The Daily we cover a number of stories that show how despite the ongoing bear market, the field continues to attract major investments and cryptocurrency companies keep on expanding their services.

### Australian Banks Fraudulently Collected Fees From Deceased Customers

A national inquiry into the misconduct of Australia's banking sector has revealed profit-driven malpractice that has shattered customer trust. The country's largest banks were found guilty of making families homeless and charging fees for non-existent services, sometimes to dead customers.

### The Crucible of Privacy: Why Decentralized Exchange Is the Only Way

Decentralization is a core principle of blockchain-based technology. It's the most important and unique property of the many cryptocurrencies that have launched since the birth of Bitcoin. Decentralization facilitates a move away from centralized control and differentiates crypto from government-backed fiat currencies.
